Sagarika Srivastava

Computer Engineer

Mumbai, India
Phone: +91 9284510103
Email: sagarikasrivastava46@gmail.com
LinkedIn: linkedin.com/in/issrivastava46
GitHub: github.com/issrivastava
Website: sagarikasrivastava.com

Internships

- **Machine Learning Intern**
- **May 2026 — Oct 2026**
- **testAIng.com**
- Assisting in the development and optimization of ML models.
- **Full Stack Development Intern**
- **Nov 2026 — Present**
- **BookMyWarehouse**

Technical Skills

- **Languages:** Python, C++, Dart, JavaScript, C#, Java, SQL, HTML/CSS
- **Frameworks & Libraries:** FastAPI, React, Flutter, OpenCV, MediaPipe
- **Databases & Backend:** PostgreSQL, RESTful APIs, Relational Database Design
- **Embedded & IoT:** Arduino, ESP32, Sensor Interfacing, Serial Communication, Blynk
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Unity

Certifications

- Mastering Python Scripting & AI — Data analysis and visualization using Power BI - MSME
- NPTEL course on Introduction to Quantum Computing: Quantum Algorithms and Qiskit

Courses

- Created Various AI Agents - Mattly, ScienceStudy, SongFinder, PollutionPop

Summary

Adaptable Computer Engineering student experienced in full-stack, mobile (Flutter), machine learning, and IoT development. Proficient in Python, C++, React, and FastAPI, with a strong foundation in building data-driven systems, REST APIs, and embedded hardware solutions.

Education

Rizvi College of Engineering (RCOE) *2023-2027*

Bandra (W), Mumbai, India

B.E in Computer Engineering
University of Mumbai
CGPA - 7.97

St. Joseph's High School (RYAN Panvel) *2009-2020*

New Panvel, Navi Mumbai, India

Ryan International group of Institutions
Percentage: 92.2%

Projects

DesertDinoDash - D3- 2D Unity Game

- Developed a 2D game in Unity featuring collision detection, obstacle behavior, and level progression
- Implemented player movement mechanics, scoring system, and increasing difficulty across levels

Technologies: Unity, C#

MedRec – Medical Record Management System

- Developed a secure full-stack medical record management system using React and FastAPI
- Designed RESTful APIs for efficient data storage and retrieval
- Implemented data visualization to analyze long-term health trends
- Improved record accessibility and reduced manual tracking

Technologies: React, FastAPI, Python, PostgreSQL

AirSential – IoT Air Quality Monitoring System

- Integrated gas sensors to detect hazardous leaks and trigger real-time alerts
- Selected for IDEATHON conducted by the University of Mumbai for innovative IoT solution

Technologies: Arduino, C++, Gas Sensors, IoT

REFIN - Full-Stack Recipe Management System

- A cross-platform mobile application built with Flutter for the UI and FastAPI with PostgreSQL for the backend.
- Features include real-time search, recipe categorization, and a favorites system.

Technologies: Flutter, PostgreSQL, FastAPI

RoboGrip: Vision-Based Gesture Control Robotic Arm

- Engineered a real-time, vision-based Human–Robot Interaction (HRI) system to manipulate a multi-DOF robotic arm using dynamic and static hand gestures.
- Implemented hand landmark detection and ML-based classification to map gestures to motor commands (movement, rotation, gripping, release).

Technologies: Python, OpenCV, MediaPipe, Machine Learning, Microcontrollers (Arduino/ESP32), Serial Communication, Servo Actuators.
